SOFTWARE ENGINEER

FULL STACK DEVELOPER | REACT, NODE.JS, GRAPHQL, AWS

Full Stack Engineer with 8+ years of experience in building scalable frontend and backend systems across fintech, media, and e-commerce domains. Proven expertise in React, Node.js, TypeScript, GraphQL, and AWS. Strong background in microservices, cloud-native development, and cross-functional team collaboration. Delivered production-grade APIs and UI systems under regulatory and high-performance constraints.

SKILLS

FRONT-END

React JS / Next JS
Astro JS / Remix JS
React Query/Router
Redux Toolkit
Styled Components
Styled Component
Bootstrap / Tailwind
Material UI / NativeWind
Vite / Webpack / Babel
Storybook / Cypress.IO
Jest / Mocha / Chai
Cucumber JS / Playwright
React Native / Expo
React Native Web View
Electron / Tauri

BACK-END

Node JS / Bun
Express JS / Hapi
GraphQL / REST API
PrismaJS / Sequelize ORM
Apollo GraphQL / GraphQL Module

DATABASE

MySQL / PostgreSQL
MongoDB / DynamoDB
Redis / Elastic Search

LANGUAGES

JavaScript / TypeScript
HTML / CSS
SCSS / LESS

MORE

Docker / Podman
Kubernetes / Terraform
AWS / GHA
Serverless Computing
Load Balancer / CDN

EXPERIENCE

SYNECHRON TECHNOLOGIES LLC

Dubai, UAE

LEAD - TECHNOLOGY

DEC 2024 - Current

Open Finance - Emirates NBD

- Leading development of Open Finance APIs for Emirates NBD, aligned with UAE Central Bank's "Compete and Comply" framework.
- Architecting scalable, secure Node.js microservices to enable regulated financial data sharing between LFIs and TPPs.
- Collaborating with stakeholders and regulators to implement core payment workflows including multi-party, future-dated payments, and consent management.
- Delivered the first production release with hands-on contributions in API security, system design, performance optimization, and governance.
- Developed expertise in financial interoperability, user consent frameworks, and compliance-driven banking architecture.

Tech Stack

TypeScript, Express.js, MongoDB, OpenShift, 3Scale, Jenkins, Cucumber.js, Playwright, AWS

CONDE NAST TECHNOLOGY LAB

Bangalore, Karnataka, India

SOFTWARE ENGINEER II

JUNE 2021 - NOV 2024

TNY Caption Contest, User Personalization

- Built full-stack solution for TNY Caption Contest, handling multi-stage frontend, backend, and database design, with a cron-based Kubernetes job for Instagram caption ingestion.
- Integrated ML-driven personalization content based on user activity and rendered dynamic UI components from predictive data models.
- Collaborated with cross-functional teams to deliver feature-rich experiences aligned with editorial goals.
- Mentored junior developers, reviewed code, and led performance improvements across the platform.
- Instrumented event tracking using Snowplow and ensured scalability of high-traffic features.

Tech Stack

React.js, Node.js, MongoDB, Kubernetes, CronJobs, Snowplow, GraphQL, TypeScript

SOFTWARE ENGINEER I

Home Page, Name Drop and Newsletter

- Led POC and implementation of server-driven UI components to adapt layout/styling based on device configurations for TNY editors, reducing duplication across screen sizes.
- Developed Name Drop Quiz app from Figma designs, integrating backend data, clue logic, and animation-based UX for gamified user engagement.
- Built and optimized newsletter subscription units (inline/footer) and toggle logic to boost TNY's recurring user subscriptions.
- Enhanced TNY homepage and article UX by integrating audio signals for articles, increasing content discoverability.
- Engineered dynamic daily/weekly email templates managed via admin panel, driving editorial communication campaigns.

Tech Stack

React.js, GraphQL, AWS, Styled Components, Storybook, Prisma, MongoDB, MySQL, Kubernetes, Terraform, GitHub Actions, Hapi, Express, Datadog, Serverless, Fastly CDN, Databricks, Vitest

EDUCATION

ARUNAI ENGINEERING COLLEGE

Tiruvannamalai, Tamil Nadu, India

BACHELOR OF ENGINEERING IN MECHANICAL ENGINEERING

AUG 2013 - JUN 2016

KUMARAN POLYTECHNIC COLLEGE

Tiruvannamalai, Tamil Nadu, India

DIPLOMA IN MECHANICAL ENGINEERING

AUG 2010 - JUN 2013

LANGUAGES

ENGLISH, TAMIL, HINDI

HTC GLOBAL SERVICES

Chennai, Tamil Nadu, India

SOFTWARE DEVELOPER

FEB 2020 - JUNE 2021

Manipal Education and Lead Management

- Developed microservices for Manipal's online degree platform, covering class assessments, surveys, and quizzes.
- Built lead ingestion pipeline using AWS serverless architecture to transform and store large Salesforce datasets in DynamoDB.
- Leveraged AWS SQS, EC2, and ElasticSearch for scalable event handling, compute, and search operations.
- Worked with containerized services using Docker and maintained backend with Express.js and Sequelize ORM.

Tech Stack

TypeScript, Express.js, Sequelize, Mongoose, SCSS, DynamoDB, AWS SQS, Lambda, EC2, ElasticSearch, Docker

DEVELOP SCRIPT LLC

Chennai, Tamil Nadu, India

NODE JS DEVELOPER

DEC 2018 - JAN 2020

Mazzady, Sothebi, PreRio, SlotCycle

- Developed APIs for auction-based e-commerce platforms with bidding and direct-buy features.
- Integrated third-party services for payments, shipping, and notifications.
- Managed real-time data binding between frontend, backend, and mobile apps using Socket.IO.

Tech Stack

React.js, Express.js, Handlebars.js, EJS, AWS RDS, Redux, Socket.IO, Redis Pub/Sub, Async Waterfall, MySQL

SELSUN TECHNOLOGIES

Chennai, Tamil Nadu, India

SOFTWARE TRAINEE

DEC 2017 - NOV 2018

- Enhanced OpenCV-based image processing algorithms for semi-device equipment.
- Contributed to vision system deployments and completed projects under tight deadlines.

Tech Stack

C++, Python, OpenCV

FREELANCE CONTRIBUTIONS

ORIGIN PROTOCOL

San Francisco, California, US

FRONTEND ENGINEER

DEC 2020 - FEB 2021

Worked on functional enhancements for a decentralized application using Ethereum blockchain. Integrated Web3.js with MetaMask and contributed to dApp feature development.

Tech Stack

TypeScript, Express.js, Lerna.js, GraphQL, Solidity, Styled Components, Web3.js, Python Flask, Mocha, Chai
